VEHICLE'S GLOVEBOX WITH YOUR OWNER'S MANUAL

INFORMATION ABOUT THE ENGINE IN YOUR KIA VEHICLE

If you have not obtained the free software
update described in this pamphlet,
please promptly visit your local Kia dealership
or call to make an appointment.

Software Upgrade: Knock Sensor Detection System (“KSDS”)

Kia has developed new engine monitoring technology called a “knock sensor detection system.”

This software is designed to detect early signs of excessive connecting rod bearing wear within the engine’s rotating assembly, which is ordinarily associated with an engine knocking noise.

The system will detect a knocking noise and will then notify the driver via dashboard warning lights, as well as place the vehicle into a reduced power, engine protection mode. The vehicle should be taken to a Kia dealership immediately if the dashboard warning lights illuminate and the vehicle goes into engine protection mode.

This technology is now available for your vehicle at no cost to you. If you have not done so, please visit a Kia dealership to receive this software update.

15-Year/150,000-Mile Limited Warranty

Kia is extending the Powertrain Limited Warranty for 15 years or 150,000 miles, whichever comes first, for certain engine repairs for original and subsequent owners of certain following vehicles originally equipped with or replaced with the respective corresponding genuine multipoint fuel injection ("MPI") or gasoline direct injection ("GDI") engine within Original Equipment Manufacturer specifications:

- 2010–2013 model year Kia Forte vehicles with a Theta II 2.4-liter MPI engine
- 2010–2013 model year Kia Forte Koup vehicles with a Theta II 2.4-liter MPI engine
- 2014–2018 model year Kia Forte vehicles with a Nu 2.0-liter GDI engine
- 2014–2016 model year Kia Forte Koup vehicles with a Nu 2.0-liter GDI engine
- 2011–2016 model year Kia Optima Hybrid (HEV) vehicles with a Theta II 2.4-liter MPI Hybrid engine
- 2017–2020 model year Kia Optima Hybrid (HEV/PHEV) vehicles with a Nu 2.0-liter GDI Hybrid engine
- 2011–2013 model year Kia Sorento vehicles with a Theta II 2.4-liter MPI engine
- 2012–2016 model year Kia Soul vehicles with a Gamma 1.6-liter GDI engine
- 2014–2019 model year Kia Soul vehicles with a Nu 2.0-liter GDI engine
- 2011–2013 model year Kia Sportage vehicles with a Theta II 2.4-liter MPI engine

The extended warranty covers all costs of inspections and repairs including, parts, labor, and diagnosis, for the engine short block assembly and long block assembly caused by a connecting rod bearing failure.

To obtain extended warranty benefits, you will need to get the KSDS update from a Kia dealership before experiencing an otherwise qualifying engine failure. Customers that own certain vehicles subject to NHTSA Recall Numbers 20V750 or 21V844 are eligible for extended warranty benefits regardless of KSDS update completion. If your vehicle is subject to one of these recalls but you have not completed the recall, please contact your nearest Kia dealership to schedule an appointment. Kia strongly encourages all owners of the vehicles listed above to have your local Kia dealership install the KSDS update if you have not done so already.

Regular maintenance is essential to obtaining the highest level of performance, safety, and reliability from your Kia. As explained in the Owner's Manual, you should routinely check your vehicle's engine oil level (at every fill up) and regularly replace the engine oil and oil filter (see your Owner's Manual to determine how often you should change your vehicle's oil and filter – at least every 7,500 miles and every 12 months under normal usage, or if you frequently operate your vehicle in a mix-mode of SEVERE and NORMAL driving conditions, changing your oil every 5,500 miles or sooner may be appropriate). Maintaining your vehicle according to the Owner's Manual is required to ensure that your warranty coverage remains intact. Damage or failure caused by an owner's neglect is not covered under warranty, including the extended warranty given by Kia in connection with the KSDS update described in this pamphlet.

In addition to the extended warranty, you might be eligible to receive compensation for future out-of-pocket expenses reasonably related to a connecting rod bearing failure or for related repair delays. Generally, in order to be eligible for these additional benefits, you must complete the KSDS update by November 4, 2023. Also, in the unlikely event you experience an engine compartment fire, you might qualify for compensation. Please refer to the settlement website KiaEngineClassSettlement.com or call (800) 944-1025 for additional details on reimbursement eligibility and how to submit a claim.

If you opted out of the settlement, your vehicle will be excluded from future extended warranty coverage. Also excluded from future extended warranty coverage are individuals and commercial entities engaged in vehicle sales, leasing, financing, or renting of vehicles, including automobile dealers, leasing companies, automobile auction houses, vehicle brokers, banks, credit unions, or other lienholders. Prospective buyers wishing to confirm whether there is applicable engine warranty coverage should call (800) 333-4542 (4Kia).

ENGINE MAINTENANCE LOG

You should keep detailed receipts and records of vehicle maintenance, including date of service, mileage at time of service, and a description of service and/or parts installation performed. Along with your records, the scheduled maintenance log in this pamphlet can help you document this information. If you sell your vehicle, be sure to give your maintenance records to the new owner. In instances where Kia suspects your vehicle has been subjected to Exceptional Neglect, you may be required to provide vehicle maintenance records for vehicle maintenance performed to receive repairs under the Extended Warranty. Under normal driving conditions, Kia recommends replacing the engine oil and oil filter at least every 7,500 miles and every 12 months. Please consult your Owner's Manual for further information.

Date	Mileage	Description of Service

Please contact the Kia Customer Care Center at (800) 333-4542 (4Kia) if you have any questions regarding the information in this pamphlet.
